

## Marine Lantern (EL-300A)

The EL-300A Marine Lantern is rugged, compact, lightweight signal lantern for Fairway Buoys and Beacons.

### Features

- Can be used as medium range or long range shore beacons, fairway markings, ship wrecks markings and other marine obstructions.
- Precision - moulded 300mm diameter polycarbonate fresnal lens with focus marks and integral bird spike.
- Robust aluminium alloy body and lens ring
- Lens ring hinged for easy service, having gaskets and spanner hinge fastener nuts.
- Provision for external Photocell.
- Standard pre-focused twin-filament or lamp changer can be used.
- Large base body to accommodate any type of flasher and lamp changer presently manufactured and being used all over the world.
- High optical efficiency makes EL-300A very suitable for solar power.
- Can also be adapted as mains operated system where uninterrupted mains are available.
- Light weight, sturdy and compact.
- UV Stablised Lens available in clear, green, red or yellow colours.
- External Photocell.
- Choice of six Place lampchanger LC-6 or twinfilament lamps upto 100 Watts.
- NPF 100 Electronic Flasher.
